

ATTENTION!

2009-2011 Vulcan® 1700 Voyager® Owners

THE KAWASAKI AIR MANAGEMENT SYSTEM (KAMS) IS NOW AVAILABLE FROM KAWASAKI AS A COMPLETE RETRO-FIT KIT FOR YOUR VULCAN® 1700 VOYAGER®.

Install the KAMS Kit to:

Reroute heat generated from the engine and exhaust from the rider cockpit downward and away from the motorcycle.

Enjoy a noticeably cooler riding experience.

Reduce heat during stops and extended periods of low speed operations such as during staging for group rides.

Rider Testimonial:

“The KAMS Kit works great! After installing, I immediately sat on the bike in 91 degree weather with 98% humidity and wasn’t able to feel any heat on my legs”.

**- Vulcan 1700 Voyager Owner,
Ted Gasiorowski**
